CRAIG HARRISON

UI/UX **//** Front End Developer **//** Graphic Designer

ABOUT ME...

Since my teens I have enjoyed building websites and designing. I'm quite a creative person.

I started teaching myself when I was 14 in Frontpage express, making website for friends bands in school on Geocities. I still enjoy learning to this day.

I enjoy computer games and I have a passion for music (playing, mixing and mastering, which I learnt during COVID lockdowns), when I'm not working or watching my two kids you can usually find me at a gig somewhere in the UK

I like to learn and currently I am learning the following...	Guitar
	Bass
	Drums
	Keyboard/Piano
REACT.JS	Melodica
VUE.JS	Ukulele
TYPESCRIPT	
LARAVEL	

EMPLOYMENT...

Active Robots (circa 2006 - 2010)

My first job whilst continuing my studies at Bath University.

I was responsible for updating the website with new products, this was before content management systems and was all done manually with HTML tables.

Thermaglaze (circa 2010 - 2013)

I spent 3 years doing graphic design and marketing. My job involved mainly print work here designing brochures, leaflets, adverts for newspapers, signage and vehicle wraps.

I also liaised with design companies that managed the designed the website, communicating changes that the managing director wanted to make.

Expert Agent / Zoopla (2013 - present)

I joined Expert Agent in September 2013. Expert Agent is a cloud based software company for Estate Agents that also offer websites.

Working in a small team of one other person, we build, design, manage and maintain over 600 websites for estate agents across the UK. These websites are built on Joomla.

My main duties these days are building websites, managing components and modules via GIT. Using my knowledge of PHP and Javascript to add new features and general bug fixing.

In 2017 ExpertAgent was acquired by Zoopla.

In 2023 Zoopla rebranded ourselves to 'Zoopla Websites' a separate entity to Expert Agent,

Freelance (ad-hoc)

Throughout the years, doing this, I have also done a few freelance website and graphic design projects. This includes websites and graphic design for Pet Shops, Landscaping and Groundworks companies, photographers, kitchen installers, garage door companies and musicians
